OUR PROFILE

KS Constructions is an Industrial building construction company, which was established in 2011. The most promising aspect of the company is that it has a team of very experienced persons handling various aspects of the construction process. They bring their wide level of knowledge gained from their long experience into every project, and are instrumental in turning each project into successful milestones. Their expertise helps in meticulously planning, guiding, coordinating, executing and ensuring timely delivery of every project.

The company believes in delivering every project on time without compromising on quality, workmanship and finish.

Our mission is to build constructions that are absolutely cost effective and to the complete satisfaction of the customers.

Our activities are all geared to achieve total satisfaction of the customers and towards this end we use all our expertise and skill in achieving the same.

Apart from industrial building, it is also involved in building roads, drains, underground tanks and other utility projects.

Interior contracting is another area of its engagement, where the interiors of office, industry or factory are contracted to renowned firms that specialize in these activities.

HIGHPOINTS

QUALITY

Our primary focus is on maintaining quality in all aspects of our work.

TECHNOLOGY

We are technologically oriented so assessment, evaluation, execution and every other detailing is comprehensively done using technology.

SPEED

We believe in cost-effectiveness both for the client and us, and therefore we are committed to speedy action and execution.

ASSURANCE

All our project work has the assurance of total dedication, commitment, quality, safety and aesthetic appeal.

CLEAN WORKING ENVIRONMENT

It is just not the industrial building alone, we lay special emphasis on ensuring clean working environment.

EXTRA CARE FOR SAFETY

We are absolutely uncompromising in ensuring safety standards in all aspects of our work. Customer safety is foremost in any kind of work that we undertake.

CUSTOMER-ORIENTED EXECUTION

We cater to the needs of our customers as all work is primarily to meet the desires or requirements of our customers.

PROFESSIONAL WORKMANSHIP

All our projects bear the stamp of professional workmanship. Being industrial projects, it is vital that professionalism permeates in every sphere of our activity.

APPLICATION OF LATEST TECHNOLOGIES

We deploy the latest in technologies to obtain the best results and to suit the convenience of our customers.

FLEXIBILITY

We are willing to be flexible where we can to meet customer needs. While the framework on which we work is always intact, we are open to flexible suggestions or requirements to fulfill customer needs.

TIMELY DELIVERY

We believe in meeting the time schedule as agreed and therefore place a lot of emphasis on completing within the agreed time schedule.

DEDICATION & COMMITMENT

Every project is undertaken with utmost dedication and commitment as industrial constructions warrant stricter norms and standards which we comply with absolutely.

SERVICES

LAND DEVELOPMENT

We undertake land development work in large scale basis and can utilize all kinds of Machinery for those activities.

UNDERGROUND TANKS

We also undertake to build underground tanks for Water Tanks, ETP, STP including all types of water proofing.

FACTORY BUILDINGS

Experience in handling industrial projects in various Industrial sectors such as Engineering, Automobile & Auto ancillary, Chemical and Textile.

ROADS, DRAINS AND SEWER

We also carry out construction of Roads, Drains and Sewage canals or pass way. This is part of utility construction that we undertake.

INTERIOR CONTRACTING

We have understanding with interior designers and they can be contracted to do specific kind of interiors, if our customers so wish.

MISC STRUCTURAL WORKS

Structural works such as Small Sheds, Utility Sheds, Rolling Shutter, Fencing and Hand Rails are undertaken.

UTILITY BUILDINGS

We undertake utility buildings which are as important for industrial sectors such as LT/HT roots, DG & Transformer Yards, Hazardous & Waste Storage Tanks, Car, Truck and Two wheeler parking.

BOUNDARY WALL AND FENCING

Fencing and Compound wall of industrial building, Offices and Multi-storied complexes are also undertaken.
